“Hi-Spec CNC can offer a wide range of machined components and complex assemblies”

A division of WEC Group based in East Lancashire, Hi-Spec CNC specialises in CNC machining of components in a wide variety of materials using the latest production technology.

CNC turning utilising driven tooling and sub-spindle offers customers a ‘one-hit’, cost-effective solution.

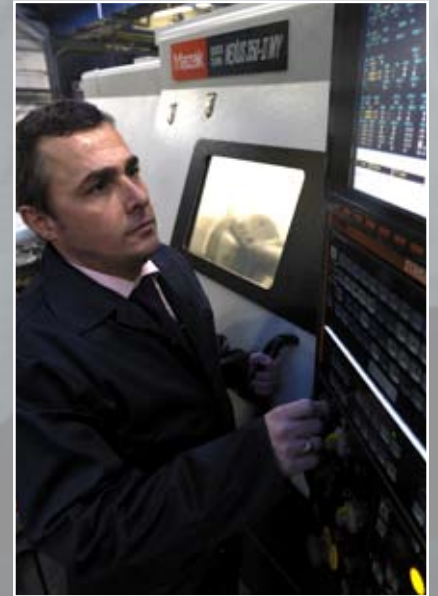

Utilising off-line systems to minimise machine programming and downtime, the shopfloor provides a rapid response, delivering high accuracy milled and turned parts to meet customer requirements.

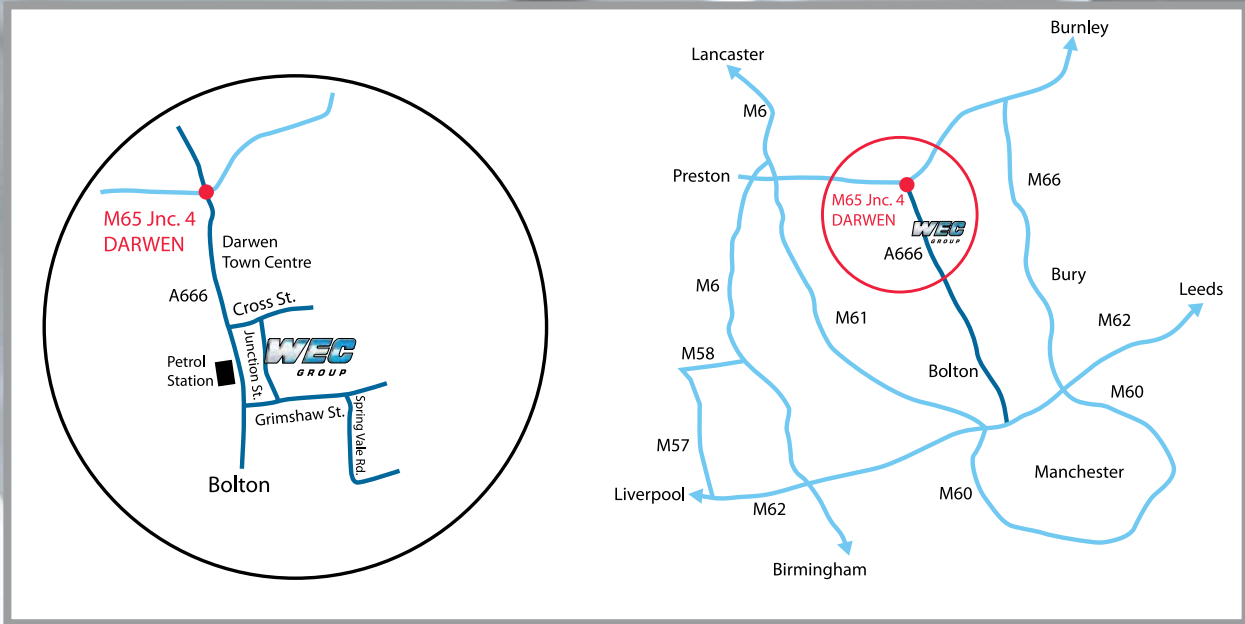

With capacity up to 3 metres in length, Hi-Spec CNC has a range of vertical and horizontal CNC milling machines.

Pallet loading of components, resulting in increased efficiency, provide additional benefits for customers.

Fully approved to ISO 9001:2008, Hi-Spec CNC can provide customers with full documentation including computerised inspection reports on their components.
